References

A. By giving numerals

This should be cited in the text by placing Arabic numerals in brackets [3] or immediately after the reference, name or the relevant statement. All references must be cited; any not cited must be placed in a bibliography, which should follow the Reference section. References and Bibliography should appear at the end of the Chapter . References must be complete and include the author(s)' initials and last name, title of paper or book, name of journal, year of publication, volume and pages on which the article appears, etc. Book references must include year of publication, publisher and city of publication. Anthologies, collection and proceedings must include names of editors and pages on which the reference appears. Books in a series must include series title and number/volume if applicable.

B. By giving full surname and year

References are cited in the text by name and year of publication in brackets. For one author, use author's surname and the year (Abell, 1945). For two authors, give both names and the year (Abell and Smith, 1956). For three or more authors, use a surname of the first author, plus «et al.», and the year (Abell et al., 1954). You may put also the number of section, chapter, theorem, etc., after the year: (Abell, 1945, Theorem 2), (Abell and Smith, 1956, Sect.2.1), (Backer, 1963, Chap.3). If giving a list of references, separate them using semi-colons (Backer, 1963; Jones, 1965, 1971b; Tarantello, 1982a, b). Put only the year in brackets when referring to the author(s) of the referenced publication (for example, «This work was first developed by Smith (1991), and later expanded by Brown et al. (1994), who demonstrated that ...»)

Section «References» is not numbered. Only essential references, which are directly referred to in the text, should be included in the references list. References must be listed alphabetically by surname (with initials following). If there are several works by the same author(s) the references should be listed in the appropriate order indicated below:

One author: list works chronologically;

Author and same co-author(s): list works chronologically;

Author and different co-author(s): list works alphabetically according to co-author(s).

If there are several works by the same author(s) and in the same year, but which are cited separately, they should be distinguished by the use of «a», «b», etc., put after the year.

References should appear only in the following three forms: journal reference, reference to book, reference to multi-author work.

Journal reference should include: author's surname and initials; surnames and initials of remaining authors; year of publication (in brackets); article title (in italics); abbreviated journal title; volume number (in bold, without «Vol.», «No.», etc.); page numbers (without «pp.»); language of publication except for English if relevant (in brackets) .

Reference to book should include: author's surname and initials; surnames and initials of remaining authors; year of publication (in brackets); the book title (in italics); volume (with «Vol.»), chapter (with «Chap.») or page (with «pp.») numbers if relevant; the name of the publisher: place of publication; language of publication except for English if relevant (in brackets).

Reference to multi-author work should include after the year of publication: the chapter title (in italics); «In:» followed by book title; surname(s) and initials of editor(s) and abbr. «ed» or «eds» (in brackets); «Vol.» and volume number when appropriate; «pp.» and page numbers; the name of the publisher: place of publication; language of publication except for English if relevant (in brackets).
