Editorial

The first Information and Communication Technologies International Symposium (ICTIS'05) was held in Tetuan, Morocco in June 3-6, 2005. It was technically sponsored by IEEE and attracted more than 127 researchers from 27 countries around the world. This special issue is based on a topic-focused selection of best papers presented at this Symposium. These papers have been further refereed (by at least two referees each) and improved to their final form presented here. We would like to express our gratitude to a fantastic team of referees who acted in a timely manner to make this issue possible.
