EDITORIAL

It gives me great pleasure to write this editorial for the special 5th anniversary issue of *International Journal of Computer Science & Education (IJCSA)*. This special issue contains articles written by some of our editors. My association with the editorial team of IJCSA started in end of 2003 when we have decided to publish online free access journal. At that time, the journal looked quite different visually from what it does today, as the journal was not formatted properly but instead produced from camera-ready manuscripts submitted by the authors. It was quite usual to see at least 3 or 4 font types (and sizes!) in one single issue of the journal.

Quality-wise, the journal was by no means less superior than it is now, however. Over the past 5 years, the journal has maintained its status as one of the premier online journals in general computer science. Many positive changes have occurred to the journal and the impact factor of the journal has also been on the continuous rise.

As editor-in-chief of the journal, I was also blessed by enthusiastic assistance of managing editor, Dr. Camacho, and many other individuals for reviewing manuscripts for the journal. With an efficient editorial team and with the support of TMRF staff, the authors enjoy the speedy publication they deserve. I take this opportunity to thank all of them. This 5th anniversary special issue celebrates a successful dissemination of archival research in computer science, technology, and engineering.
