EDITORIAL

This special issue of the International Journal of Computer Science and Applications is dedicated to few selected papers from those presented in the second edition of the Information and Communication Technologies International Symposium (ICTIS'07), which took place in Fez, Morocco in April 3-5, 2007.

These papers are devoted to the implementation of different ICT tools to solve problems related to several applications such as image processing, embedded systems, target recognition, patrimony management, education and geographic information systems.

We seize this occasion to address our heartiest thanks to all the reviewers of these papers for their timely and very efficient work, namely,

A. Ait Ouahman, Cadi Ayyad University; Morocco

J. Calmet, University of Karlsruhe, Germany

J.-Y. Chung, IBM Watson Research. USA

M. Paprzicky, Systems Research Institute of the Polish Academy of Sciences, Poland

M. Carmen Carrion Pérez, University of Granada, Spain

D. Petcu, Western University of Timisoara, Romania

B. Rekiek, Axima, Belgium

J. A. Sobrino, University of València, Spain

We also address our thanks to all the members of the Organizing Committee and Technical Committee of ICTIS'07 for their efforts which made this edition of this symposium a very successful one.
