EDITORIAL (Vol. 6, No. 1, January 2009)

This special issue of the International Journal of Computer Science & Applications, dedicated to *Grid and Parallel Computing*, presents 9 papers that obtained the highest marks in the thorough reviewing process. Papers accepted for the publication address challenging issues of Security, Access Control, Scheduling, and Efficient File Transfer in Grids Computing. Papers in Parallel Computing proposed classical PRAM algorithms and efficient algorithms for many-cores.

At this point of time I would like to register my sincere thanks to all the reviewers for reviewing papers very critically and send reports in time. Without their full support it would have been an uphill task.
