CONTENTS (Vol. 6, No. 5, December 2009)

Editorial	iii
1. Efficient skyline refinement using trade-offs respecting don't care Attributes. Christoph Lofi and Wolf-Tilo Balke, <i>University of Braunschweig</i>	01
2. Protecting agents from malicious hosts using TPM. Antonio Muñoz, Antonio Maña and Daniel Serrano, <i>University Malaga</i>	30
3. e3alignment: Exploring inter-organizational alignment in net worked value constellations. Vincent Pijpers, Jaap Gordijn and Hans Akkermans, <i>VU University</i>	59
4. A method for creating enterprise architecture metamodels – applied to systems modifiability. Robert Lagerstrom, Ulrik Franke, Pontus Johnson and Johan Ullberg, <i>Royal Institute of Technology, Sweden</i>	89
5. 3MSF: A framework to select mobile office devices. Carlos Cares, <i>University of La Frontera</i> and Xavier Franch, <i>Universitat Politècnica de Catalunya</i>	121
6. Integration of domain-specific modelling languages and UML through UML profile extension mechanism. Giovanni Giachetti, Beatriz Marin and Oscar Pastor, <i>Universidad Politècnica de Valencia</i>	145
7. A pattern-based method for building requirements documents in call-for-tender processes. Samuel Renault, <i>CRP Henry Tudor</i> , Oscar Mendez-Bonilla, <i>Instituto Politécnico Nacional</i> , Xavier Franch, and Carme Quer, <i>Universitat Politècnica de Catalunya</i>	175

Editorial (Vol. 6, No. 5, December 2009)

The 3rd International Conference on Research Challenges in Information Science (RCIS) aimed at providing an international forum for scientists, researchers, engineers and developers from a wide range of information science areas to exchange ideas and approaches in this evolving field. While presenting research findings and state-of-art solutions, authors were especially invited to share experiences on new research challenges.

Quality papers in all information science areas were solicited and original papers exploring research challenges did receive especially careful interest from reviewers. Papers that had already been accepted or were currently under review for other conferences or journals were no to be considered for publications at RCIS'09.

This special issue of the International Journal of Computer Science & Applications, dedicated to *Advanced Solutions for Information System Engineering*, presents 7 extended versions of long papers that obtained the highest marks in the reviewing process. In the context of RCIS'09, they are linked to Information System modelling from requirements to databases and devices issues.
